If, by reason of any of the foregoing limitations or any equivalent article or term of a Parity Obligation, on the relevant Dividend Date, Dividends are not paid in full or dividends or other distributions are not paid in full on any Parity Obligation, but on such Dividend Date there are Distributable Reserves, then each Holder will be entitled to receive from the Issuer the Relevant Proportion (as defined below) of any such Dividend. No Holder shall have any claim in respect of any Dividend or part thereof not payable as a result of any such limitations or any equivalent article or term of a Parity Obligation. Accordingly, such amount will not accumulate for the benefit of the Holders or entitle the Holders to any claim in respect thereof against the Issuer.

Dividends will not be cumulative and Holders will have no claim for any Dividends not paid (or not paid in full) pursuant to any limitation or qualification on the Issuer’s obligation to pay Dividends as described in the Issuer Articles and summarised above. Accordingly, amounts not paid on the Preference Shares as a result of any such limitation or qualification are not “**due**” or “**payable**” in accordance with the terms of the Preference Shares.

“**Distributable Reserves**” means, at any time, the amounts for the time being available to the Issuer for distribution as a dividend in compliance with Section 403 of the Companies Act, Chapter 50 of Singapore (“**Available Amounts**”) as at the date of the Issuer’s latest audited balance sheet; provided that if the Board of Directors of the Issuer reasonably believes that the Available Amounts as at any Distributable Reserves Determination Date:

- are lower than the Available Amounts as at the date of the Issuer’s latest audited balance sheet; and
- are insufficient to pay the Dividend and for payments on Parity Obligations on the relevant Dividend Date,

then two Directors of the Issuer shall provide a certificate, on or prior to such Distributable Reserves Determination Date, to the Holders (accompanied by a certificate of the Issuer’s auditors for the time being) of the Available Amounts as at such Distributable Reserves Determination Date (which certificate shall be binding absent manifest error) and “**Distributable Reserves**” as at such Distributable Reserves Determination Date for the purposes of such Dividend shall mean the Available Amounts as set out in such certificate.

“**Distributable Reserves Determination Date**” means, with respect to any Dividend Date, the day falling twenty Business Days prior to that Dividend Date.

“Parity Obligations” means any preference shares or other similar obligations of DBS Bank that constitute Tier I capital of DBS Bank on an unconsolidated basis or have characteristics similar to securities that could qualify as Tier I capital of DBS Bank on an unconsolidated basis and are not expressly stated to rank in all material respects senior or junior to:

- the Preference Shares; or
- any other guarantee given or support agreement entered into by DBS Bank in respect of any preference shares, or other preferred securities (not constituting debt obligations) having in all material respects the same ranking as preference shares, issued by any subsidiary of DBS Bank that constitute Tier I capital of DBS Bank on an unconsolidated basis or have characteristics similar to securities that could qualify as Tier I capital of DBS Bank on an unconsolidated basis and are not expressly stated to rank in all material respects senior or junior to the Preference Shares.

“Relevant Proportion” means in relation to any partial payment of a Dividend, the amount of Distributable Reserves as at the relevant Distributable Reserves Determination Date divided by the sum of:

- the full amount originally scheduled to be paid by way of Dividend (whether or not paid in whole or part) during the Issuer’s then-current fiscal year; and
- the sum of the full amount of any dividends or other distribution or payments in respect of Parity Obligations originally scheduled to be paid (whether or not paid in whole or part) during the Issuer’s then-current fiscal year,

converted where necessary into the same currency in which Distributable Reserves are calculated by the Issuer.

Dividend Stopper

If any Dividend is not paid in full for any reason, the Issuer will not:

- declare or pay any dividends or other distributions in respect of, or (if permitted) repurchase or redeem, its ordinary shares or any other security or obligation of the Issuer ranking junior to the Preference Shares (or contribute any moneys to a sinking fund for the redemption of such shares, securities or obligations); or
- (if permitted) repurchase or redeem any Parity Obligation which are securities,

in each case until the Issuer has paid Dividends in full in respect of such number of consecutive Dividend Periods as shall be equal to or exceed 12 calendar months (or an amount equivalent to the Dividends to be paid in respect of such number of consecutive Dividend Periods as shall be equal to or exceed 12 calendar months has been paid or irrevocably set aside in a separately designated trust account for payment to the Holders).

Redemption

The Preference Shares are perpetual securities with no maturity date, and are not redeemable at the option of the Holders.

Subject to the limitations and qualifications described in the Issuer Articles and summarized below under *“Redemption: Limitations and Qualifications”*, the Preference Shares may be redeemed for cash as described below, in whole and not in part:

- at the option of the Issuer, on any date on or after the date falling 10 years after the Issue Date (the **“First Call Date”**) (based on the expected Issue Date of November 22, 2010, November 22, 2020) at the Redemption Price (as defined below);
- at the option of the Issuer, on any day while a Tax Event (as defined below) continues, at the Redemption Price, provided that if there is available to the Issuer the opportunity to eliminate the Tax Event by pursuing some reasonable measure that:
 - will not have an adverse effect on the Issuer or the Holders; and
 - will not involve any material cost to the Issuer or the Holders,the Issuer will pursue that measure in lieu of redemption; or
- at the option of the Issuer, on any day while a Change of Qualification Event (as defined below) continues, at the Redemption Price.

Any such redemption shall not prejudice the rights of the Holders to be so redeemed to receive any accrued but unpaid Dividends payable on the redemption date.

“Redemption Price” means, with respect to any Preference Share, an amount equal to:

- the Liquidation Preference of that Preference Share; plus
- subject to the limitations and qualifications described in the Issuer Articles and summarised above under *“Dividends: Limitations and Qualifications”* and unless a Dividend Limitation Notice is in effect, an amount equal to any accrued but unpaid Dividends (whether or not declared) in respect of that Preference Share for the period commencing from (and including) the first day of the Dividend Period in which the relevant redemption falls and ending on (but excluding) the relevant redemption date.

Redemption: Change of Qualification Event

“Change of Qualification Event” means as a result of:

- any change or proposed change to the relevant requirements issued by the MAS in relation to the qualification of the Preference Shares as Tier I capital securities of DBS Bank or to the recognition of the Preference Shares as capital for calculating the Tier I and total capital adequacy ratios of DBS Bank, in each case on a consolidated or unconsolidated basis;
- any change in the application of official or generally published interpretation of such relevant requirements issued by the MAS or any relevant authority (including a ruling or notice issued by the MAS or any relevant authority); or

- any interpretation or pronouncement by the MAS or any relevant authority that provides for a position with respect to such relevant requirements issued by the MAS that differs from the previously generally accepted position in relation to similar transactions or which differs from any specific written statements made by any authority regarding the qualification of the Preference Shares as Tier I capital securities of DBS Bank or to the recognition of the Preference Shares as capital for calculating the Tier I and total capital adequacy ratios of DBS Bank, in each case on a consolidated or unconsolidated basis,

which change or amendment,

- (1) (subject to (2) below) becomes, or would become, effective on or after the Issue Date; or
- (2) in the case of a change or proposed change to the relevant requirements issued by the MAS, if such change is issued or is expected to be issued by the MAS, on or after the Issue Date,

the Preference Shares, in whole or in part, would not qualify as Tier I capital securities of DBS Bank (excluding, for the avoidance of doubt, non-qualification solely by virtue of DBS Bank already having, or coming to have, on issue securities with an aggregate principal amount up to or in excess of the limit of Tier I capital securities permitted pursuant to the relevant legislation and statutory guidelines in force as at the Issue Date).

Redemption: Tax Event

“**Tax Event**” means that as a result of (1) any change in, or amendment to, any law or regulation of Singapore or any political subdivision or any authority thereof or therein having power to tax or (2) any change in the general application or official interpretation of any law or regulation by any relevant body in Singapore, payments to Holders with respect to the Preference Shares would be subject to deduction or withholding for or on account of tax or would give rise to any obligation of the Issuer to account for any tax in Singapore, and such obligation cannot be avoided by the Issuer, as the case may be, taking reasonable measures available to it.

Redemption: Limitations and Qualifications

The Issuer may only exercise its right to redeem the Preference Shares for cash if the Issuer is permitted to redeem the Preference Shares by Singapore company law and the following “**Redemption Conditions**” have been satisfied:

- the prior written consent of the MAS to the redemption of the Preference Shares, if then required, has been obtained and any conditions that the MAS may impose at the time of any consent, if then required, have been satisfied; and
- the requirements as to Singapore law for the redemption of the Preference Shares have been satisfied.

Taxation and Additional Amounts

If at any time the Issuer is required to deduct or withhold for taxes, duties, assessments or governmental charges imposed by Singapore on payments under the Preference Shares, the Issuer will, subject to certain exceptions described in the terms of the Preference Shares pay or procure the payment of additional amounts (“**Additional Amounts**”) needed so that the net amounts received by the holders of Preference Shares, after such deduction or withholding, will equal the amounts that would have been received had no such deduction or withholding been required.

Reference to the payment of Dividends or interest or any other amounts on, or in respect of, the Preference Shares includes the payment of additional amounts to the extent that, in the context, additional amounts are, were or would be payable.

Rights upon Dissolution of Issuer

In the event of the commencement of any dissolution or winding-up of the Issuer (other than pursuant to a Permitted Reorganisation) before any redemption of the Preference Shares, Holders will, subject to applicable laws, be entitled to receive from the Issuer an amount up to the Liquidation Distribution in respect of each Preference Share held solely out of the assets of the Issuer available for distribution under applicable laws. Such entitlement will rank after payment or settlement of the claims of:

- all other creditors of the Issuer; and
- persons with claims against the Issuer which are not Parity Obligations nor subordinated to the Preference Shares.

If:

- the Liquidation Distribution or any other liquidation distributions cannot be made in full with respect to the Preference Shares by reason of the limitation described in the Issuer Articles and summarised above or any equivalent article or term of any Parity Obligation; but
- there are funds available enabling payment of part of the Liquidation Distribution with respect to the Preference Shares,

then each Holder will be entitled to receive from the Issuer, and the Issuer shall pay to each Holder, the Relevant Proportion of the Liquidation Distribution in respect of each Preference Share held.

After payment of the Liquidation Distribution (or the Relevant Proportion thereof), the holders of the Ordinary Shares will be entitled to any remaining assets of the Issuer available for distribution and Holders will have no further right or claim to any of the remaining assets of the Issuer.

“**Relevant Proportion**” means, in relation to any partial payment of any Liquidation Distribution, the total amount available for any such payment and for making any liquidation distribution on any Parity Obligation divided by the sum of:

- the full Liquidation Distribution before any reduction or abatement; and

- the amount (before any reduction or abatement) of the full liquidation distribution on any Parity Obligation, converted where necessary into the same currency in which liquidation payments are made to creditors of the Issuer.

Voting Rights

If (and so long as) for such number of consecutive Dividend Periods as shall be equal to or exceed 12 months, Dividends have not been paid in full when due and payable, Holders shall have the right to receive notice of, attend, speak and vote at general meetings of the Issuer and such right shall continue until after the next following Dividend Date on which a Dividend is paid in full (or an amount equivalent to the Dividend to be paid in respect of the next Dividend Period has been paid or irrevocably set aside in a separately designated trust account for payment to the Holders). Every Holder who is present in person at such general meetings shall have on a show of hands one vote and on a poll one vote for every Preference Share of which he is the Holder.

The consent in writing of the Holders of at least 75 per cent. of the outstanding Preference Shares or the sanction of a Special Resolution passed at a separate class meeting of the Holders (the quorum at such class meeting to be such number of the Holders holding or representing not less than two-thirds of the outstanding Preference Shares) shall be required in order to give effect to any variation or abrogation of the rights, preferences and privileges of the Preference Shares by way of amendment to the amended and restated Memorandum and Articles of Association of the Issuer or otherwise (including, without limitation, the authorisation or creation of any shares or securities convertible into shares of the Issuer ranking, as to the Liquidation Preference or as to participation in the profits or assets of the Issuer, senior to the Preference Shares) unless otherwise required by applicable law.

No such consent or sanction shall be required:

- if the change of the rights, preferences and privileges of the Preference Shares by way of amendment to the amended and restated Memorandum and Articles of Association of the Issuer is solely of a formal, minor or technical nature, or is to correct an error or cure an ambiguity, provided that such change does not reduce the amounts payable to Holders, impose any material obligation on Holders or materially adversely affect their voting rights;
- for the creation or issue of further shares ranking *pari passu* with or junior to the Preference Shares (the creation or issue of such other shares, regardless of the dividends and other amounts payable in respect of such shares and whether and when such dividends and other amounts may be so payable, shall not be deemed to be a variation or abrogation of the rights, preferences and privileges of the Preference Shares); or
- for the redemption, purchase or cancellation of the Preference Shares in accordance with the Issuer Articles.

No provision of the Preference Shares may be amended without the prior written consent of the MAS if such amendment would or may result in the Preference Shares not being treated as Tier I capital of DBS Bank on a consolidated or unconsolidated basis.

Any substantial increase in non-performing assets ("NPAs") may impair the DBS Group's business, financial condition, and results of operations.

NPAs of the DBS Group were S\$3.51 billion as at September 30, 2010 and S\$4.22 billion as at December 31, 2009. As a percentage of gross customer loans, the DBS Group's non-performing loans were 2.1% as at September 30, 2010 and 2.9% as at December 31, 2009. Adverse changes in the credit quality of the DBS Group's borrowers and counterparties or adverse changes arising from a deterioration in global and regional economic conditions or asset values may lead to an increase in NPAs in the future and require an increase in the DBS Group's level of allowances for credit and other losses or increase the level of asset write-downs or write-offs experienced by the DBS Group. Although the DBS Group devotes considerable resources to managing these risks, many of the factors affecting borrower and counterparty credit risks are beyond the control of the DBS Group. A substantial increase in NPAs may have a material adverse effect on the DBS Group's business, financial condition, and results of operations.

A decline in collateral values or inability to realise collateral value may increase the DBS Group's allowances for credit and other losses.

Adverse changes in the credit quality of the DBS Group's borrowers and counterparties or adverse changes arising from a deterioration in global and regional economic conditions or asset values could reduce the recoverability and value of the DBS Group's assets. In particular, a significant portion of the DBS Group's loan portfolio is secured by real estate. In the event of a decline in the real estate markets, a portion of the DBS Group's loans may exceed the value of the underlying collateral. Any decline in the value of the collateral securing the DBS Group's loans, inability to obtain additional collateral or inability to realise the value of collateral may require the DBS Group to increase its allowances for credit and other losses, which may adversely affect the DBS Group's business, financial condition and results of operations.

Liquidity shortfalls and credit rating downgrades may increase the cost of funds.

Most of the DBS Group's funding requirements are met through a combination of funding sources, primarily in the form of deposit-taking activities and interbank funding. As at September 30, 2010, 74% of the DBS Group's total liabilities were attributable to non-bank deposits while 8% came from interbank liabilities. As a portion of the DBS Group's assets have long-term maturities, funding mismatches may occur. As at September 30, 2010, a significant portion of the DBS Group's non-bank customer deposits had current maturities of one year or less or were payable on demand. Such deposits are mainly from savings, fixed and current accounts and demand deposits. The DBS Group's deposits base is diversified and does not rely on any significant depositor funding. However, no assurance can be given that large-scale deposit withdrawals will not occur. In circumstances where a substantial number of depositors, within or outside Singapore and Hong Kong, withdraw such funds from the DBS Group, the DBS Group's liquidity position could be materially adversely affected. In such a situation, the DBS Group could be required to seek short-term and long-term funds, which may be more expensive than current funding sources, to finance operations, which may adversely affect the DBS Group's business, financial condition and results of operations.

The DBS Group's credit ratings also play an important role in determining the extent of its market access to the capital and funding markets. A credit rating downgrade could adversely affect the volume and pricing of the DBS Group's funding.

The DBS Group's income and expenses relating to its international operations and its foreign assets and liabilities are exposed to foreign currency fluctuations.

The DBS Group's overseas operations are subject to fluctuations in foreign currency exchange rates against the Singapore dollar. In addition, a portion of the DBS Group's income, expenses, assets and liabilities in Singapore are denominated in foreign currencies. To the extent that the DBS Group's foreign-currency denominated income, expenses, assets and liabilities are not matched in the same currency or appropriately hedged, fluctuations in foreign currency exchange rates against the Singapore dollar may adversely affect the DBS Group's business, financial condition and results of operations. In addition, fluctuations in foreign exchange rates will create foreign currency translation gains or losses. The DBS Group's largest overseas presence is in Hong Kong. Fluctuations in the exchange rate of the Hong Kong dollar may ultimately affect the Singapore dollar value of revenues from Hong Kong operations as such revenues may be denominated in Hong Kong dollars. While the Hong Kong Government has continued to pursue a fixed exchange rate policy, with the Hong Kong dollar pegged at approximately HK\$7.80 to U.S.\$1.00, the DBS Group cannot assure investors that such policy will be maintained.

The value of certain financial instruments recorded at fair value may change over time.

The fair values of financial instruments traded in active markets are based on quoted market prices at the balance sheet date. If the market for a financial asset is not active, the DBS Group establishes fair value by using valuation techniques or third party valuations. These include the use of recent arm's length transactions, reference to other instruments that are substantially similar, discounted cash flow analysis and option pricing models. Valuation reserves may be applied to the valuation of the financial instruments, where appropriate.

The valuation of the majority of the DBS Group's financial instruments reported at fair value is based on quoted and observable market prices or on internally developed models that are based on independently sourced market parameters, including interest rate yield curves, option volatilities and currency rates. Other factors such as model assumptions, market dislocations and unexpected correlations can materially affect these estimates and the resulting fair value estimates.

Any updates in such assumptions, judgments and estimates to reflect new information or changes in market trends and conditions could materially impact the DBS Group's business, financial condition and results of operations.

Expansion into Asian markets may adversely affect the DBS Group's results of operations.

Over time, the DBS Group expects to expand into other countries in Asia. While this may be positive for the DBS Group's long-term position and may enhance revenue diversification, it also increases operational and asset quality risks. There can be no assurance that such regional expansion will not have a material adverse effect on the DBS Group's business, financial condition and results of operations, or that the DBS Group's credit and provisioning policies will be adequate in relation to such risks.

Significant fraud, systems failure or calamities could adversely impact the DBS Group's business.

The DBS Group seeks to protect its computer systems and network infrastructure from physical break-ins as well as fraud and systems failures. The DBS Group employs external surveillance security systems, including firewalls, tokens and password encryption technologies, designed to minimise the risk of security breaches around the clock. Although the DBS Group intends to continue to implement security technologies, conduct regular vulnerability assessments and network penetration tests and establish operational procedures to prevent break-ins, damages and failures, there can be no assurance that these security measures will be successful. In addition, although the DBS Group's centralised data centre and back-up systems are separately located in different places, there can be no assurance that both systems will not be simultaneously damaged or destroyed in the event of a major disaster. The DBS Group seeks to maintain internal controls in line with international best practices. However, a significant breakdown in internal controls, fraudulent activities by employees or failure of security measures or back-up systems may have a material adverse effect on the DBS Group's business, financial condition and results of operations.

The DBS Group is subject to the risk of increased liquidity and capital requirements to meet the minimum required by regulators.

The MAS determines the level of liquidity and capital that the DBS Group is required to hold in relation to its balance sheet, off-balance sheet, counterparty and risk exposures. At the moment, the DBS Group meets the MAS's requirements in these aspects. The DBS Group is capitalised above MAS's stated targets of 6% and 10% for Tier I and Total Capital Adequacy Ratios respectively, on a Basel II basis, both on a standalone and consolidated basis. The DBS Group's ability to maintain its target regulatory capital ratios could be affected by a number of factors, including its earnings, fair value adjustments, the calculation of risk-weighted assets, and changes to the minimum regulatory requirements imposed by the MAS.

In particular, the Basel Committee has announced new rules for liquidity and capital requirements intended to reinforce existing standards ("**Basel III**"), including new definitions for qualifying capital instruments, more onerous deductions from capital, additional capital buffers, increased minimum capital adequacy ratios, the introduction of core Tier 1 Capital and leverage ratios, and further liquidity requirements, among others. If the regulatory capital requirements, liquidity requirements or ratios applied to the DBS Group are increased in the future, any failure by the DBS Group to satisfy such increased regulatory capital ratios or liquidity requirements within the applicable timeline could result in administrative actions or sanctions or significant reputational harm, which in turn may have a material adverse effect on the DBS Group's business, financial condition and results of operations.

The DBS Group's business is subject to reputational risk

Reputational risk is the potential for damage to the DBS Group's franchise resulting in loss of earnings or adverse impact on its business as a result of stakeholders taking a negative view of the DBS Group or its actions. Reputational risk could arise from the failure by the DBS Group to effectively mitigate the risks in its businesses including one or more of country, credit, liquidity, market, regulatory, operational, environmental, litigation or social risk. Damage to the DBS Group's reputation could cause existing clients to reduce or cease to do business with the DBS Group and prospective clients to be reluctant to do business with the DBS Group. A failure to manage reputational risk effectively could materially affect the DBS Group's business, financial condition and results of operations.

Material changes in financial market conditions could result in an adverse impact on the DBS Group's business, financial condition and results of operations.

The DBS Group is exposed to market risk arising from market-making, structuring and packaging of investment products for clients, trading and fund deployment. Trading market risk arises from the impact on interest rate margins and trading profits as a result of changes in foreign exchange rates, commodity

prices, equity prices, interest rates and credit spreads. Changes in interest levels, yield curves and spreads may affect, among other things, interest rate margins. Changes in foreign exchange rates may affect, among other things, the value of assets and liabilities denominated in foreign currencies and also the reported earnings of the DBS Group's non-Singapore dollar-denominated branches and subsidiaries. Any dislocation or material change in financial markets can have a material adverse impact on the DBS Group's business, financial condition and results of operations.

Systemic risk resulting from failures in the banking industry could adversely affect the DBS Group.

Within the banking industry the default of any institution could lead to defaults by other institutions. Concerns about, or a default by, one institution could lead to significant liquidity problems, losses or defaults by other institutions because the commercial soundness of many financial institutions may be closely related as a result of their credit, trading, clearing or other relationships. This risk is sometimes referred to as "systemic risk" and may adversely affect financial intermediaries, such as clearing agencies, clearing houses, banks, securities firms and exchanges with whom the DBS Group interacts on a daily basis, which could have an adverse effect on the DBS Group's ability to raise new funding and on the DBS Group's business, financial condition and results of operations.

Country risk could result in an adverse impact on the DBS Group's business, financial condition and results of operations.

Country risk is the risk that a counterparty is unable to meet its contractual obligations as a result of adverse economic conditions or actions taken by governments in the relevant country. This includes the risk that a sovereign borrower may be unable or unwilling to fulfill its foreign currency or cross-border contractual obligations; and a non-sovereign counterparty may be unable to fulfill its contractual obligations as a result of currency shortage due to adverse economic conditions or actions taken by the government of the country. These risks could have an adverse impact on the DBS Group's business, financial condition and results of operations.

Terrorist activities, natural calamities and outbreak of communicable diseases around the world could lead to higher volatility in international capital markets, which may materially and adversely affect the DBS Group's financial condition.

Terrorist attacks, natural calamities and outbreak of communicable diseases could result in sporadic volatilities in international capital markets or adversely affect Singapore and other economies. Any material change in the financial markets or the Singapore economy or regional economies as a result of these events or developments may materially and adversely affect the DBS Group's financial condition and results of operations.

An economic downturn could adversely affect the DBS Group's operations, asset quality and growth.

With 84% of its total assets (excluding goodwill) in Singapore and Hong Kong on a geographical basis as at September 30, 2010, the DBS Group's performance and the quality and growth of its assets are substantially dependent on the health of the Singapore and Hong Kong economies. The economic environment in Singapore and Hong Kong, which are dependent on trade and investment, may be significantly impacted by a variety of external factors, including the economic developments throughout Asia and in the United States and other markets. The DBS Group offers banking and financial services to its customers elsewhere in South-East Asia, South Asia, China, Europe, the United States and other countries. Its business is directly affected by the economic environment in the countries where it operates. The Asian financial crisis, which began in 1997, had an adverse effect on the economies of Singapore and Hong Kong and on the region. Many countries in the region experienced severe currency fluctuations, liquidity shortages and higher interest rates during the crisis. The recent financial crisis impacted the DBS Group through an increase in non-performing loans and mark-downs in other assets. Likewise if, in the future, a spread of communicable disease, another financial crisis or large-scale acts of war or terrorism, or any other adverse social or political incident should occur, the economic conditions in the affected markets would likely be adversely affected. A downturn in Singapore, Hong Kong or elsewhere in Asia could have a material adverse effect on the DBS Group's business, financial condition or results of operations.

Increased competition could result in decreased loan margins and reduced market share.

The DBS Group's primary competitors consist of other Singapore banks and major international banks licensed in Singapore, other Hong Kong banks and major international banks licensed in Hong Kong, major international banks licensed elsewhere and other financial institutions in other markets in which the DBS Group operates.

In recent years, the Singapore Government has taken steps to liberalise the Singapore banking industry, which has resulted in increased competition among domestic and international banks operating in Singapore, which reduced margins for certain banking products. In particular, the MAS, which regulates banks in Singapore, has been granting Qualifying Full Bank ("QFB") licenses to international financial institutions since 1999. QFBs are currently permitted to establish operations in up to 25 locations. These 25 locations can be used for branches or off-site ATMs. QFBs are permitted to share ATMs among themselves. International banks granted such licenses will face fewer restrictions on their Singapore dollar deposit-taking and lending activities. In addition, in recent years the Singapore Government has allowed more international banks to obtain "wholesale banking" licenses to enable them to expand their Singapore dollar wholesale banking business in Singapore and to broaden the scope of Singapore dollar banking activities in which international banks may participate. Further, since the implementation of the United States Singapore Free Trade Agreement ("USSFTA"), which was signed in May 2003, Singapore banks, including the DBS Group, are subject to additional competition in areas that were traditionally the stronghold of local banks. The USSFTA has eliminated QFB and wholesale bank license quotas for U.S. banks and significantly relaxed certain other restrictions on international banking activities. There can be no assurance that the DBS Group will be able to compete successfully with other domestic and foreign financial institutions or that such increased competition will not have a material adverse effect on the DBS Group's business, financial condition and results of operations.

Similarly, in Hong Kong and the DBS Group's other overseas markets, many of the international and local banks operate in the same segments as the DBS Group and compete for the same customers. Competition may increase in some or all of the DBS Group's principal markets. Such increased competition, individually or in combination, could have a material adverse effect on the DBS Group's business, financial condition and results of operations.

RISKS RELATING TO THE PREFERENCE SHARES

Payments of Dividends on the Preference Shares may not be made, or will not be required to be made, under certain circumstances.

Notwithstanding any resources legally available to make dividends or other distributions, the Issuer will not, save to the extent and subject to the matters described in the Issuer Articles and summarised herein, be obliged to pay, and shall not pay, any Dividends on the relevant Dividend Date (and such Dividend shall not be considered to be due or payable) if:

- the Issuer is prevented by applicable Singapore banking regulations or other requirements of the MAS from making payment in full of dividends or other distributions when due on Parity Obligations;
- such payment on Parity Obligations would cause a breach of the MAS' published consolidated or unconsolidated capital adequacy requirements from time to time applicable to the Issuer; or
- the Issuer has insufficient Distributable Reserves.

Investors will not be entitled to recover missed dividends on the Preference Shares because they are not cumulative.

Dividends are not cumulative. If and to the extent the Issuer does not declare all or any portion of a dividend for payment on the Preference Shares or is prohibited by the terms of the Preference Shares from paying all or any portion of a Dividend, investors will not receive that Dividend or portion of a Dividend not paid and will have no claim to that Dividend or portion, whether or not the Issuer has funds to pay that Dividend or portion thereof or subsequently pays Dividends under the Preference Shares.

Payment of dividends on the Preference Shares by the Issuer is subject to the discretion of the Issuer.

Dividends on the Preference Shares shall be payable in arrear on each Dividend Date when, as and if declared by DBS Bank's Board of Directors. If DBS Bank's Board of Directors does not declare a dividend payable on a Dividend Date, the right of Holders to receive a dividend in respect of the Dividend Period ending on the day immediately preceding such Dividend Date shall extinguish and DBS Bank shall have no obligation to pay the dividend accrued for such Dividend Period or to pay any interest thereon whether or not dividends on the Preference Shares are declared for any future Dividend Period.

If the financial condition of DBS Bank were to deteriorate, holders of the Preference Shares could lose all or a part of their investment.

If the financial condition of DBS Bank were to deteriorate, DBS Bank could suspend dividends under the Preference Shares, and investors would not receive such dividends or other payments. Investors should not assume that unfavourable market or other conditions or events will not harm the financial condition of DBS Bank. If DBS Bank is liquidated, dissolved or wound up, investors could lose all or a part of their investment. The Preference Shares will not be deposit liabilities of DBS Bank for any purpose and will not be insured by any governmental agency or compensation scheme of Singapore or any other jurisdiction.

The ratings of DBS Bank or the Preference Shares could be lowered and this may affect the market price of the Preference Shares.

DBS Bank has received a long-term rating of "AA-" from Fitch Ratings, a long-term deposit rating of "Aa1" from Moody's and a long-term counterparty credit rating of "AA-" from Standard & Poor's. The Preference Shares have been rated "A" by Fitch, "A3" by Moody's and "A" by Standard & Poor's.⁴ Downgrades or potential downgrades in these ratings, the assignment of new ratings that are lower than existing ratings, or downgrades or potential downgrades in the ratings assigned to DBS Bank, its subsidiaries or any of their respective securities could reduce the range of potential investors in the Preference Shares and adversely affect prices for and the liquidity of the Preference Shares. There can be no assurance that the ratings assigned to DBS Bank or the Preference Shares will remain in effect for any given period or that the ratings will not be revised by the rating agencies in the future if, in their judgment, circumstances so warrant. The ratings may not reflect the potential impact of all risks related to structure, market, additional factors discussed above, and other factors that may affect the value of the Preference Shares. A credit rating is not a recommendation to buy, sell or hold securities and may be suspended, reduced or withdrawn by the rating agency at any time.

The terms of certain of the outstanding instruments of DBS Bank could limit its ability to make payments on the Preference Shares or materially and adversely affect the financial condition of DBS Bank.

DBS Bank has and will continue to have outstanding indebtedness. Also, DBS Bank may in the future issue, directly or through its subsidiaries instruments, securities which may constitute Parity Obligations or senior obligations, that may restrict or prohibit its ability to make payments on the Preference Shares. Compliance with certain provisions in the existing debt instruments or future obligations of DBS Bank may not be entirely within its control. Any failure to comply with the covenants contained in these debt instruments or the occurrence of any other event of default under those instruments could lead to an acceleration of all amounts outstanding thereunder, which would require that DBS Bank immediately repays those amounts. DBS Bank cannot assure investors that its indebtedness, or any indebtedness that it may incur in the future, and their respective restrictions, will not materially and adversely affect its ability to finance its future operations or capital needs, or otherwise materially and adversely affect its business, financial condition, results of operations and cash flows.

The Preference Shares do not have a stated maturity date.

The Preference Shares are not repayable in cash unless the Issuer, at its sole discretion but subject to obtaining the approval of the MAS and the satisfaction of the Redemption Conditions and certain other conditions, redeems them for cash on or after the First Call Date. Accordingly, unless the Issuer redeems

Neither Fitch, Moody's nor Standard & Poor's has consented for the purposes of Section 249 of the SFA to the inclusion of the credit ratings quoted above which are publicly available and is thereby not liable for such information under Sections 253 and 254 of the SFA. DBS Bank has included the above credit ratings in their proper form and context and has not verified the fairness and accuracy of such credit ratings.

the Preference Shares for cash, investors who wish to obtain the cash value of their investment will have to sell their Preference Shares. The dividend rate on the Preference Shares will not be adjusted to reflect subsequent changes in interest rates or other market conditions, the results of operations or financial condition of DBS Bank. As a result, investors may not be able to sell their Preference Shares for the amount of their original investment.

If the Issuer redeems the Preference Shares, investors may not be able to reinvest the redemption proceeds in a comparable security at a similar return on investment.

If one of the Tax Events or Change of Qualification Events (as defined herein), as the case may be, occurs at any time after the issuance of the Preference Shares, subject to obtaining the approval of MAS and the satisfaction of the Redemption Conditions and certain other conditions, the Issuer may redeem the Preference Shares at their Redemption Price. There is no assurance that investors will be able to reinvest their redemption proceeds to obtain a similar return on investment.

There is no prior market for the Preference Shares and an active or liquid market for the Preference Shares may not develop.

The Preference Shares will constitute a new issue of securities with no established trading market. While the SGX-ST has granted its approval in-principle for the listing of the Preference Shares on the SGX-ST, there can be no assurance that, even if such listing approval has been received, any market for the securities will develop or be sustained or whether, or at what price, holders of such securities will be able to sell or otherwise transfer their securities. If an active trading market for the Preference Shares does not develop or is not sustained, the market prices and liquidity of the Preference Shares may be adversely affected.

Exchange rate risks and exchange controls

The Issuer will pay dividends on the Preference Shares in Singapore dollars. This presents certain risks relating to currency conversions if an investor's financial activities are denominated principally in a currency or currency unit (the "Investor's Currency") other than Singapore dollars. These include the risk that exchange rates may significantly change (including changes due to devaluation of the Singapore dollar or revaluation of the Investor's Currency) and the risk that authorities with jurisdiction over the Investor's Currency may impose or modify exchange controls. An appreciation in the value of the Investor's Currency relative to the Singapore dollar would decrease (i) the Investor's Currency equivalent yield on the Preference Shares, (ii) the Investor's Currency equivalent value of the Liquidation Preference and (iii) the Investor's Currency equivalent market value of the Preference Shares.

Government and monetary authorities may impose (as some have done in the past) exchange controls that could adversely affect an applicable exchange rate. As a result, investors may receive less Dividends or Liquidation Preference than expected, or no Dividends or Liquidation Preference.

Legal investment considerations may restrict certain investments.

The investment activities of certain investors are subject to legal investment laws and regulations, or review or regulation by certain authorities. Each potential investor should consult its legal advisers to determine whether and to what extent (i) the Preference Shares are legal investments for it, (ii) the Preference Shares can be used as collateral for various types of borrowing and (iii) other restrictions apply to its purchase or pledge of any Preference Shares. Financial institutions should consult their legal advisers or the appropriate regulators to determine the appropriate treatment of the Preference Shares under any applicable risk-based capital or similar rules.

UNITED STATES

The Preference Shares have not been and will not be registered under the Securities Act and may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons except in certain transactions exempt from the registration requirements of the Securities Act. Terms used in this paragraph have the meanings given to them by Regulation S.

The Preference Shares are being offered and sold outside of the United States in reliance on Regulation S.

In addition, until 40 days after the commencement of the offering of the Preference Shares, an offer or sale of the Preference Shares within the United States by a dealer that is not participating in the offering may violate the registration requirements of the Securities Act.

HONG KONG

The Preference Shares may not be offered or sold in Hong Kong, by means of any document, any Preference Shares other than (a) to “professional investors” as defined in the Securities and Futures Ordinance, Chapter 571 of Hong Kong (the “**Securities and Futures Ordinance**”) and any rules made thereunder; or (b) in other circumstances which do not result in the document being a “prospectus” as defined in the Companies Ordinance, Chapter 32 of Hong Kong (the “**Companies Ordinance**”), or which do not constitute an offer to the public within the meaning of the Companies Ordinance.

No advertisement, invitation or document relating to the Preference Shares, whether in Hong Kong or elsewhere, which is directed at, or the contents of which are likely to be accessed or read by, the public of Hong Kong (except if permitted to do so under the securities laws of Hong Kong) has been or will be issued other than with respect to Preference Shares which are or are intended to be disposed of only to persons outside Hong Kong or only to “professional investors” within the meaning of the Securities and Futures Ordinance and any rules made thereunder.

SINGAPORE TAXATION

The statements made herein regarding taxation are general in nature and based on certain aspects of the current tax laws of Singapore and administrative guidelines issued by the relevant authorities in force as of the date of this Offer Information Statement and are subject to any changes in such laws or administrative guidelines, or in the interpretation of these laws or guidelines, occurring after such date, which changes could be made on a retrospective basis. These laws and guidelines are also subject to various interpretations and the Singapore tax authorities or Courts could later disagree with the explanations or conclusions set out below. The statements below are not to be regarded as advice on the tax position of any holder of the Preference Shares or of any person acquiring, selling or otherwise dealing with the Preference Shares or on any tax implications arising from the acquisition, sale or other dealings in respect of the Preference Shares.

The statements made herein do not purport to be a comprehensive or exhaustive description of all of the tax considerations that may be relevant to a decision to subscribe for, purchase, own or dispose of the Preference Shares and do not purport to deal with the tax consequences applicable to all categories of investors, some of which (such as dealers in securities) may be subject to special rules. Prospective holders of the Preference Shares are advised to consult their own tax advisers as to the Singapore or other tax consequences of the acquisition, ownership of or disposal of the Preference Shares, including the effect of any foreign, state or local tax laws to which they are subject. It is emphasised that none of the Issuer, the Managers and any other persons involved in the preparation of this document accepts responsibility for any tax effects or liabilities resulting from the subscription for, purchase, holding or disposal of the Preference Shares.

A. Income Tax

The Preference Shares

Dividend distributions

With effect from January 1, 2008, all Singapore-resident companies are under the one-tier corporate tax system (“**one-tier system**”). Under the one-tier system, the tax on corporate profits is final and dividends paid by a Singapore-resident company are tax exempt in the hands of a shareholder, regardless of whether the shareholder is a company or an individual and whether or not the shareholder is a Singapore tax resident. In addition, no withholding tax is applicable on such dividends.

Accordingly, on the basis that the Issuer is tax resident in Singapore and is under the one-tier system, dividends declared and paid by the Issuer should not be subject to Singapore tax in the hands of the Preference Shareholders, regardless of their tax residence status.

Gains on disposal of Preference Shares

Singapore does not impose tax on gains of a capital in nature but imposes tax on income. There are no specific laws or regulations which deal with the characterisation of whether a gain is income or capital in nature. Gains arising from the disposal of the Preference Shares may be construed to be of an income nature and subject to Singapore income tax, especially if they arise from activities which the Inland Revenue Authority of Singapore (the “**IRAS**”) regards as the carrying on of a trade or business in Singapore.

In addition, Preference Shareholders who apply, or who are required to apply, the Singapore Financial Reporting Standard 39 Financial Instruments - Recognition and Measurement (“**FRS 39**”) for the purposes of Singapore income tax may be required to recognise gains or losses (not being gains or losses in the nature of capital) in accordance with the provisions of FRS 39 (as modified by the applicable provisions of Singapore income tax law) even though no sale or disposal of Preference Shares is made.

Preference Shareholders who may be subject to such tax treatment should consult their own accounting and tax advisers regarding the Singapore income tax consequences of their acquisition, holding and disposal of the Preference Shares.

B. Goods and Service Tax (“GST”)

The sale of the Preference Shares by a GST-registered investor belonging in Singapore to another person belonging in Singapore is an exempt supply not subject to GST. Any input GST incurred by the investor in making such an exempt supply is generally not recoverable from the Singapore Comptroller of GST.

Where the Preference Shares are supplied by a GST-registered investor in the course of or furtherance of a business carried on by such investor contractually to and for the direct benefit of a person belonging outside Singapore, the sale should generally, subject to satisfaction of certain conditions, be considered a taxable supply subject to GST at zero rate. Any input GST incurred by the GST-registered investor in making such a supply in the course of or furtherance of a business carried on by such investor may be recoverable from the Singapore Comptroller of GST.

Services such as brokerage, arranging, underwriting, handling and clearing services rendered by a GST-registered person to an investor belonging in Singapore for GST purposes in connection with the investor’s purchase, sale or holding of the Preference Shares will be subject to GST at the standard rate of 7%. Similar services rendered by a GST-registered person contractually to and for the direct benefit of an investor belonging outside Singapore should generally, subject to satisfaction of certain conditions, be subject to GST at zero rate.

C. Stamp Duty

provided that:

- (i) no such consent or sanction shall be required if the change is solely of a formal, minor or technical nature or is to correct an error or cure an ambiguity (but such change shall not reduce the amounts payable to Holders, impose any material obligation on Holders or materially adversely affect their voting rights);
- (ii) no such consent or sanction shall be required for the creation or issue of further shares ranking *pari passu* with or junior to the Class O Non-Cumulative Preference Shares (the creation or issue of such other shares, regardless of the dividends and other amounts payable in respect of such shares and whether and when such dividends and other amounts may be so payable, shall not be deemed to be a variation or abrogation of the rights, preferences and privileges of the Class O Non-Cumulative Preference Shares);

- (ii) any transfer of a Class O Non-Cumulative Preference Share on which DBS Bank has a lien.

The Board may also decline to register a transfer unless the instrument of transfer is duly stamped (if so required).

The DBS Group reported net profit excluding one-time items and goodwill charges of \$2,023 million for the first nine months of 2010, a 25% increase from a year ago.

The 9M2010 results were underpinned by volume growth in most customer segments and lower loan loss allowances as operating trends strengthened. These positives, however, were partly offset by margin pressures arising from low interest rates.

Revenues grew 6% from a year ago to \$5,337 million. The increase was led by higher customer flows in non-interest income. Net interest income was lower. A 15% increase in loans from a year ago, which included market share gains in Singapore-dollar loans, was offset by lower net interest margins. Fee income was stable.

Expenses rose 13% to \$2,143 million as headcount was increased to support higher business volumes and investments were made for future growth.

With improved asset quality, allowances fell 34% to \$754 million. Specific allowances declined from 75 basis points of loans a year ago to 49 basis points, which is a more normalised level.

Return on equity rose to 11.1% from 9.8% while return on assets improved to 1.00% from 0.84%. The capital adequacy ratio at September 30, 2010 was 15.3%, with tier-1 at 12.1%.

A goodwill charge of \$1,018 million was taken in the second quarter of 2010 for DBS Bank (Hong Kong) Limited to reflect heightened deposit competition. The charge has no impact on the DBS Group's ability to carry out ongoing business or pay dividends as goodwill was deducted from regulatory capital on consolidation. In 2009, a one-time charge of \$23 million was recorded for the impairment of the DBS Group's investment in TMB Bank in Thailand. Including these items, the DBS Group's net profit amounted to \$1,005 million, a 37% decrease from the prior year.

Net interest income for the first nine months of 2010 was \$3,212 million. This amount represented 60% of the DBS Group's total income.

Net interest income fell 3% from a year ago. While loans increased, the impact was more than offset by a decline in interest margins. Net interest margin declined 16 basis points to 1.86% on lower asset yields, partly offset by reductions in funding costs.

Average customer loans grew 9% from a year ago, with the expansion spread across most regions and across corporate, SME and consumer borrowers.

Overall asset yields fell by 39 basis points to 2.45%. Loan yields declined as the credit environment normalised. Securities yields were also lower as higher-yielding securities were replaced by higher-quality bonds with lower yields.

Funding costs fell 24 basis points to 0.64% as market rates declined and from an improvement in the customer deposit mix towards savings and current accounts in Singapore.

Other non-interest income rose 63% to \$1,086 million in 9M2010. This amount accounted for 20% of total income, compared to 13% a year ago.

The increase from the prior year was mainly from trading. Trading activities (including financial instruments designated at fair value) recorded a gain of \$731 million in 9M2010, compared to \$378 million in 9M2009. Sales of treasury products to corporate customers rose as IBG and T&M worked together to meet customers' hedging requirements. For 9M2010, customer revenues accounted for more than half of trading income.

Other non-interest income was also supported by higher net income from financial investments on increased profit-taking and a gain from the sale of fixed assets.

Staff costs rose 8% on a 10% increase in headcount. The rise in non-wage costs were mainly driven by higher computerisation expenses, partly offset by a decline in occupancy expenses.

The cost-income ratio of 40% was slightly higher than the 38% a year ago when expenses were reined in in face of an uncertain environment.

Total allowances for 9M2010 amounted to \$754 million, a decrease of 34% from a year ago, as asset quality improved. At the end of 9M2010, non-performing loans declined to 2.1% of total loans, compared to 2.6% a year ago.

Specific allowances for loans fell 29% to \$517 million as higher charges for corporate borrowers outside of Asia were more than offset by lower charges in Singapore, Hong Kong and Rest of Greater China as economic conditions in these regions strengthened.

General allowances of \$188 million were taken during 9M2010 for loan growth. Allowance coverage for non-performing assets improved from 90% a year ago to 97%.

The business segment results are prepared based on the DBS Group's internal management reporting which reflects the organisation management structure. As the activities of the DBS Group are highly integrated, internal allocation has been made in preparing the segment information. Amounts for each business segment are shown after the allocation of certain centralised costs, funding income and the application of transfer pricing, where appropriate. Transactions between segments are recorded within the segment as if they are third party transactions and are eliminated on consolidation. In the first nine months of 2010, no one group of related customers generated more than 10% of the DBS Group's revenues.

The external presentation of the business segment results was revised from the first quarter of 2010 to better reflect internal management reporting. In addition, the DBS Group adopted a revised capital benefit and fund transfer policy with effect from January 1, 2010. Comparative figures for 9M2009 have been restated to conform to the current presentation.

The various business segments are described below:

Consumer/Private Banking provides individual customers with a diverse range of banking and related financial services. The products and services available to customers include current and savings accounts, fixed deposits, loans and home finance, cards, payments, investment and insurance products.

Institutional Banking provides financial services and products to large corporate, institutional clients and small and medium-sized businesses. The products and services available to customers include corporate finance and advisory banking services for mergers and acquisitions, capital raising through debt and equity markets, capital restructuring, syndicated finance, securities and fiduciary services,

cash management and trade services, private equity and credit facilities, deposit and treasury products. Institutional Banking also provides equity services through DBS Vickers Securities (DBSV). DBSV offers a wide range of services to retail and corporate customers including research, sales and trading, share placement, nominees and securities custodian services and distribution of primary and secondary issues. Asset management activities also fall under this segment.

Treasury provides treasury services to corporations, institutional and private investors, financial institutions and other market participants. It is primarily involved in market making, structuring, equity and debt sales and trading across a broad range of financial products including foreign exchange, interest rate, credit, equity and other structured derivatives. Income from these financial products and services offered to the customer of other business segments, such as Consumer/Private Banking and Institutional Banking, is reflected in the respective segments. Treasury is also responsible for the management of the DBS Group's asset and liability interest rate positions and investment of the DBS Group's excess liquidity and shareholders' funds.

Others encompasses a range of activities from corporate decisions and income and expenses not attributed to other business segments.

Consumer/Private Banking

Compared to the previous year, CBG's net interest income rose as strong loan growth more than offset by the impact of lower net interest margins. Mortgage loans grew 23% led by Singapore where the DBS Group gained market share with its popular fixed-rate offering. Housing loans also grew in Hong Kong, China and Taiwan. Fee income rose as wealth management sales improved modestly from a year ago.

Expenses were higher partly due to an increased headcount. This was partly offset by lower allowances.

Institutional Banking

IBG sustained its strong performance from the previous year. Revenues were higher, underpinned by stronger business loan growth across the region, and higher non-interest revenues from loan related and treasury product sales. These were partly offset by lower trade-related revenues as margins fell with normalised credit conditions.

Expenses rose due to higher wage and non-staff cost accruals. Allowance charges were lower as a decline in specific allowances was partly offset by higher general allowances.

Treasury

Treasury's revenues were slightly higher than a year ago as stronger trading performance and higher customer flows more than offset weaker net interest income. Expenses were stable while allowances remained low.

The performance by geography is classified based on the location in which income and assets are recorded.

Singapore

Net profit rose to \$1,269 million from \$902 million a year ago as higher trading income and lower allowance charges more than offset interest margin pressures as market rates remained soft.

Net interest income fell 3% due to lower loan yields even as loans grew 16%. Customer loans grew \$11.7 billion over the year, with approximately half of the increase from mortgage loans, as the DBS Group gained market share. Non-interest income rose 32% from better trading income and customer flows for treasury products.

Operating expenses rose 6% to \$1,164 million to support business expansion. Allowances fell 34% to \$541 million as asset quality improved.

Hong Kong

The results for Hong Kong incorporate the effects of a 6% appreciation of the Singapore dollar against the Hong Kong dollar in the profit and loss account, and a 7% appreciation on the balance sheet.

Hong Kong's earnings rose 29% in Singapore-dollar terms to \$435 million from higher revenues and lower allowances.

Revenues rose 9% from broad-based non-interest income growth with higher fees from trade finance, wealth management and loan syndication; higher sales of treasury products and trading gains; and higher gains from the sale of investments assets. The increase in non-interest income was partly offset by a 12% decline in net interest income as margins fell although customer loan volumes rose 16% from a year ago.

Expenses for 9M2010 included a non-recurring compensation charge to certain structured investment product customers. Excluding this charge, expenses were slightly lower.

Specific allowances were substantially lower as the NPL rate halved from 2.0% a year ago to 1.0%.

The DBS Group recorded net earnings excluding one-time items of \$2,132 million for 2009, little changed from the previous year.

Profit before allowances rose 17% to a record \$4,001 million as revenues reached a new high. Revenue growth of 9% was broad-based, underpinned by higher business volumes across consumer and corporate banking segments as the DBS Group stood by customers in a fragile economic environment. Expenses were stable from the previous year.

Net interest income grew 4% to a record \$4,455 million. The DBS Group continued to support customers' financing requirements throughout the year. Backed by a strong balance sheet, the DBS Group stepped up efforts to grow loans in its core markets. The DBS Group's share of Singapore-dollar loans grew for a second consecutive year to 20% while its share of loans in Hong Kong rose to 5.6%. Net interest margin was resilient at 2.02% as improved credit spreads and asset-liability management offset pressure from record low interest rates.

Non-interest income rose 24% to \$2,148 million. Net fee income grew 9% to \$1,394 million as higher investment banking, loan-related, stockbroking and trade finance fees more than offset weaker contributions from wealth management and fund management. Trading income recovered to \$433 million from \$23 million in 2008, benefiting from improved trading conditions.

Expenses remained stable at \$2,602 million as the DBS Group held a tight rein on expenses in the face of a challenging environment.

The DBS Group maintained a prudent approach to recognising non-performing assets. Of the assets classified as non-performing, 43% were still current in interest and principal. On this prudent basis, the NPL ratio rose to 2.9%. The increase in non-performing loans was largely due to borrowers outside Asia, which contributed to a doubling of allowances to \$1,529 million for the year. Cumulative allowances stood at 83% of non-performing assets and at 108% if collateral was considered.

The DBS Group also took the opportunity of better market conditions to divest most of its non-ABS CDO investments during the year at prices higher than their carrying values. The remaining \$45 million of non-ABS CDO investments are scheduled to mature by 2011 while \$150 million of ABS CDO investments have adequate allowance coverage exceeding 90%.

Return on equity fell to 9.6% from 10.0% while return on assets declined to 0.83% from 0.87%. The capital adequacy ratio at end-2009 was 15.1% with tier-1 at 11.5%.

A one-time charge of \$23 million was recorded in 2009 on the impairment of the DBS Group's investment in TMB Bank in Thailand. In comparison, a one-time net charge of \$127 million was recorded for 2008, comprising a \$45 million charge related to an organisation restructuring exercise, \$104 million of impairment charges on the DBS Group's investment in TMB Bank, offset by \$22 million in gains from the sale of properties.

Including these items, the DBS Group's net profit amounted to \$2,109 million, a 6% increase over the prior year.

There were no significant accounting changes for the year.

Net interest income for the year was \$4,455 million. This amount represented 67% of the DBS Group's total income in 2009, compared to 71% a year ago.

Net interest income rose 4% from a year ago primarily driven by higher customer loan balances. Net interest margin was stable as lower asset yields were offset by reductions in funding costs.

Overall asset yields fell by 108 basis points to 2.78%. The decrease was the result of the repricing and reinvestment of assets at lower interest rates. Yields on customer loans were partly mitigated by higher credit spreads.

Funding costs fell 110 basis points to 0.81% as market rates declined and from an improvement in the customer deposit mix towards savings and current accounts.

Net fee and commission income rose 9% from a year ago to \$1,394 million. This amount accounted for 21% of total income, unchanged from a year ago. The year-on-year increase of \$120 million was attributable largely to investment banking and loan-related activities, as well as improvements in stockbroking and trade finance.

Investment banking fees rose 62%. With capital markets recovering from dislocations in 2008, the DBS Group benefited from activities including REITs, equity offerings, Singapore-dollar bonds and mid-market M&A advisory, for which the DBS Group continued to lead in Singapore.

Loan-related fees rose 25%, in part due to higher refinancing volumes. The DBS Group also continued to rank highly in syndicated loan league tables in Asia ex-Japan.

Partly offsetting these positives were reduced fees from wealth management and fund management as appetite for offerings such as unit trusts, bancassurance and structured investment products remained muted.

Other fee activities such as deposit-related and credit cards were resilient.

Other non-interest income rose 65% to \$754 million in 2009. This amount accounted for 11% of total income, compared to 8% in 2008. The increase from the prior year was mainly from trading. Trading activities (including financial instruments designated at fair value) recorded a gain of \$433 million in 2009, compared to \$23 million in 2008, as trading conditions improved. Contributions were led by interest rate and foreign exchange trading, supported by healthy customer flows.

Net income from financial investments declined from \$367 million to \$254 million on reduced profit-taking. Other operating income decreased from \$61 million to \$54 million due to lower contributions from The Islamic Bank of Asia.

1/ Specific allowances for loans are classified according to booking location.

Total allowances amounted to \$1,529 million, an increase of 95% from a year ago. The rise in allowances mirrored an increase in the level of non-performing loans. At the end of 2009, non-performing loans increased to 2.9% of total loans, compared to 1.5% a year ago.

The higher levels of specific allowances for loans were mainly due to corporate borrowers outside of Asia. Asset quality in the DBS Group's main markets in Asia improved in the second half in line with economic conditions.

General allowances decreased while specific allowances for securities, properties and other assets rose. The disposal of most of the DBS Group's non-ABS CDO investments resulted in a transfer of general allowances previously set aside for them to specific allowances.

The DBS Group continued to set aside general allowances for loans to maintain prudent coverage for non-performing assets.

The business segment results for 2008 and 2009 are prepared based on the DBS Group's organisation management reporting structure in these periods. As the activities of the DBS Group are highly integrated, internal allocation has been made in preparing the segment information. Amounts for each business segment are shown after the allocation of certain centralised costs, funding income and the application of transfer pricing, where appropriate. Transactions between segments are recorded within the segment as if they are third party transactions and are eliminated on consolidation.

The various business segments are described below:

Consumer Banking provides individual customers with a diverse range of banking and related financial services. The products and services available to customers include current and savings accounts, fixed deposits, loans and home finance, cards, payments and investment products.

Institutional Banking provides financial services and products to large corporate, institutional clients and small and medium sized businesses. The products and services available to customers include corporate finance and advisory banking services for mergers and acquisitions, capital raising through debt and equity markets, capital restructuring, syndicated finance, securities and fiduciary services, cash management and trade services, private equity and credit facilities, deposit and treasury products.

Global Financial Markets provides treasury services to corporations, institutional and private investors, financial institutions and other market participants. It is primarily involved in market making, structuring, equity and debt sales and trading across a broad range of financial products including foreign exchange, interest rate/credit/equity and other structured derivatives. Income from these financial products and services offered to the customer of other business segments, such as Consumer Banking and Institutional Banking, is reflected in the respective segments. Global Financial Markets also provides equity services through DBS Vickers Securities.

Central Treasury Unit is responsible for the management of the DBS Group's asset and liability interest rate positions and investment of the DBS Group's excess liquidity and shareholders' funds.

Central Operations encompasses a range of activities from corporate decisions and income and expenses not attributed to other business segments. Asset management and private banking activities are included in this segment.

Consumer Banking

Net interest income fell 24% as deposit margins narrowed with lower interest rates. The lower deposit margin was partly offset by strong loan growth. Mortgage loans grew 13% as a result of strong disbursements in Singapore and Hong Kong. Housing loans also grew in China and Taiwan. In addition, deposits grew across most regions.

Non-interest income declined 16% as fees from wealth management product sales fell. Demand for wealth management products strengthened modestly in the second half of the year, but full-year sales volumes were lower than a year ago. Credit card fees were firm, supported by a larger card base.

Expenses fell 4% due to lower staff costs. Allowances rose slightly on higher credit card and unsecured loan charge-offs, but remained low.

Institutional Banking

Institutional Banking delivered record profit before allowances of \$2,228 million in 2009, up 16% from 2008.

Net interest income rose 14% due to improved loan margins. Business loan volumes were little changed but the DBS Group gained market share in Singapore and Hong Kong.

Non-interest income rose 10%, boosted by stronger capital market activities, including REITs, equity offerings, Singapore-dollar bonds and mid-market M&A advisory. Loan-related fees also increased due to higher refinancing volumes.

Expenses rose 4%, less than revenue growth, as spending was managed in an uncertain environment.

Stronger profit before allowances was more than offset by higher allowances for non-performing loans outside of Asia.

Global Financial Markets

Total income rose 44% as trading conditions improved. Contribution from DBS Vickers Securities was also higher as fees from stockbroking and placements rose.

Expenses decreased 9% led by lower wage costs, as profit before allowances increased strongly to \$1,041 million.

Others

Central Treasury Unit's increase in profit was mainly due to lower allowances. Allowances in 2008 included charges for investment CDOs which were largely divested in 2009.

The performance by geography is classified based on the location in which income and assets are recorded.

Singapore

Net interest income fell 5% as low interest rates affected margins on surplus funds and floating rate loans. Lower margins were partly offset by higher customer balances, led by housing loans. Deposit growth was from savings and current accounts. Non-interest income rose 56% as fee income and trading income improved.

Expenses rose 3%, less than revenue growth, due to a tight rein on costs.

Allowances of \$1,034 million were largely for corporate loans made to borrowers outside of Asia but which were booked in Singapore.

Hong Kong

The results for Hong Kong incorporate the effects of a 3% appreciation of the Hong Kong dollar against the Singapore dollar in the profit and loss account, and a depreciation of 2% on the balance sheet.

Hong Kong's earnings rose 19% in Singapore-dollar terms to \$464 million from lower costs and allowances.

Revenues fell 3% due to weaker contributions from unit trusts, insurance and trade finance activities, and lower gains from the sale of investments. Net interest income was stable and margins improved, underpinned by higher customer loan volumes.

Expenses declined 17% on lower staff and other operating costs. The previous year's expenses also included certain non-recurring expenses.

Allowances fell 10% as asset quality trends improved. The NPL ratio peaked at 2.6% in the first quarter and improved progressively to 1.7% at end-2009, unchanged from a year ago.

Other regions

Regions outside of Singapore and Hong Kong accounted for 19% of the DBS Group's net profit in 2009, compared to 15% a year ago.

The DBS Group continued to invest in China, Taiwan, Indonesia and India to tap into their long-term growth prospects. In Indonesia, India and China, the DBS Group strengthened its network of branches and sub-branches. In Taiwan, the integration of Bowa Bank, which was acquired in 2008, progressed well, with Taiwan turning profitable a year ahead of schedule.

The DBS Group reported net profit of \$2,124 million in 2008 excluding one-time items, a decline of 16% compared to 2007, reflecting the turmoil in global financial markets and the weakening credit environment.

Despite the challenging market conditions, the DBS Group continued to diversify its product offerings and geographical presence through organic growth as well as an acquisition in Taiwan.

Revenue contribution from regions outside of Singapore and Hong Kong increased from 10% a year ago to 16%, while net profit contribution rose from 7% to 15%.

The DBS Group's net interest income grew 5% to \$4,301 million as it captured customer volume growth, with loans up 17% and deposits up 11% from year-ago levels. Partly offsetting the higher volumes was a contraction in net interest margins from 2.17% to 2.04% as market interest rates fell following reductions by central banks across the globe. The impact of lower market rates was partly mitigated by wider loan spreads.

While net interest income rose to a record, the benefit was offset by reduced non-interest income from market-related activities.

Net fee income declined 13% to \$1,274 million as activities related to the financial markets such as stockbroking, investment banking and wealth management slowed significantly due to poor investment sentiment through the year.

Trading performance, including income from financial instruments designated at fair value, weakened, declining to \$23 million from \$94 million a year ago. The decrease was primarily attributable to negative marked-to-market changes in credit-related trading positions.

Net income from financial investments was also lower compared to a year ago as there were fewer opportunities to realise capital gains.

In total, revenues declined by 2% to \$6,031 million.

Increased cost management efforts were made to offset the impact of lower revenues. Staff costs decreased 9% to \$1,256 million as performance-based bonuses were cut in line with revenues. The cost-income ratio increased marginally to 43% from 42% a year ago.

Credit conditions softened during the year with contractions in the real economy. The non-performing loan ratio rose to 1.5% from 1.1% a year ago, while specific allowances for loans increased from \$92 million a year ago to \$419 million (or from 9 basis points of average loans to 35 basis points). The largest increases in allowances were for equity-related loans to private banking customers in Singapore and Hong Kong and SME loans in Hong Kong and China. The acquisition of Bowa Commercial Bank in May 2008 accounted for part of the increase in NPLs and allowances. Credit quality of consumer and corporate loans, which form the majority of the DBS Group's loan book, remained comparatively strong.

In addition, a total of \$189 million in allowance charges were made for CDOs in the DBS Group's investment book during the year, compared to \$243 million in 2007. At end-2008, the DBS Group's cumulative allowance coverage for \$264 million of ABS CDOs and \$792 million of non-ABS CDOs in its investment portfolio were raised to 93% and 27% respectively.

Return on assets was 0.87% compared to 1.18% a year ago, while return on equity declined to 10.0% from 12.3%.

There was a net one-time charge of \$127 million for 2008 reported below the line, comprising a \$45 million charge related to an organisation restructuring exercise, \$104 million of impairment charges on the DBS Group's investment in TMB Bank in Thailand, offset by \$22 million in gains from the sale of properties. In comparison, a net charge of \$209 million was booked in 2007, comprising \$264 million of impairment charges for TMB, offset by a \$55 million write-back in allowances for properties. Including these one-time items, the DBS Group's reported net profit amounted to \$1,997 million in 2008 and \$2,334 million in 2007.

Following amendments to FRS 39 and FRS 107, the DBS Group elected to reclassify \$2,389 million of held-for-trading assets to the available-for-sale category during the third quarter and \$1,789 million of available-for-sale to loans-and-receivables during the fourth quarter. Besides this, there were no other significant accounting changes for the year.

Net interest income for the year was \$4,301 million, an increase of 5% from 2007. This amount represented 71% of the DBS Group's total income in 2008, up from 67% a year ago.

Most of the DBS Group's business and regional customer segments achieved strong volume growth and average earning assets increased 11% to \$210,460 million. Within the funding mix, average customer deposits grew 14% while other borrowings decreased 1%.

The resulting growth in net interest income was partly offset by a reduction in net interest margin from 2.17% to 2.04%.

Amid a backdrop of declining market rates, overall liability costs declined by 86 basis points to 1.91%, while overall asset yields fell by a larger 95 basis points to 3.86%.

The table below indicates that higher volumes had a greater impact on net interest income growth in 2008 than interest margins.

Fund management	32	43	(26)
Wealth management	137	249	(45)
Others	66	65	2
Total	1,274	1,462	(13)

Net fee and commission income declined 13% from a year ago to \$1,274 million. This amount accounted for 21% of total income, compared to 24% in 2007.

Financial market dislocations intensified in 2008. The volatility led to reduced volumes in market-related activities. While the DBS Group continued to rank well in various domestic league tables, in absolute terms, fees from stockbroking, investment banking and sale of wealth management fell sharply from record levels in 2007, registering declines of 39%, 47% and 45% respectively.

Partly offsetting these declines was continued growth in syndicated finance. Loan-related fees rose 29% to \$299 million as the DBS Group secured several high-profile syndicated deals in the region. For the year, the DBS Group was ranked third in Basis Point's Asia ex-Japan/Australia loans bookrunner league table.

Non-market related activities such as trade and remittance and credit cards remained resilient in the first nine months of the year. However, there was a modest slowing in the fourth quarter in these activities.

Net gain from fixed assets	5	6	(17)
Others	61	43	42
Total	456	593	(23)

Trading activities (including financial instruments designated at fair value) recorded a gain of \$23 million, significantly lower compared to recent years. Income from customer flows and trading gains in interest rate and foreign exchange instruments were offset by losses related to credit instruments and CDOs.

These losses included the unwinding of the DBS Group's Rosa conduit as well as of positions related to certain Lehman-exposed investment products sold to customers.

Net income from financial investments declined from \$450 million to \$367 million as weaker markets reduced opportunities for profit taking. Other income rose with increased contributions from The Islamic Bank of Asia.

Revenue-related	147	135	9
Others	502	453	11
Total	2,610	2,616	(0)

Expenses were little changed at \$2,610 million.

Staff costs declined 9% as bonuses were reduced with lower revenues. Headcount grew 1% to 14,683. Staffing increased mainly in China, Taiwan (with the acquisition of Bowa), Indonesia and India to support business expansion, partially offset by decreases in Singapore and Hong Kong.

An organisation restructuring exercise was implemented during the fourth quarter, involving a 6% reduction in headcount, largely in Singapore and Hong Kong. A severance package resulted in an one-time \$45 million charge that was reported below the line. The streamlined organisation structure is expected to lead to productivity and workflow improvements.

Non-staff costs increased 10% to \$1,354 million. This included \$70 million set aside as potential compensation for customers who had invested in High Notes and Constellation products, and a \$50 million write-off on a technology project. If these items were excluded, non-staff costs were stable.

Total	784	431	82

1/ Specific allowances for loans are classified according to booking location.

Total allowances rose to \$784 million from \$431 million in 2007. Most of the increase was attributable to specific allowances for loans.

General loan allowances increased \$32 million to \$234 million, largely due to higher provisions set aside for the DBS Group's investment in CDOs (\$141 million in 2008 compared to \$93 million in 2007). The DBS Group also continued to set aside general allowances to support growth in loans and commitments during the year.

Specific allowances for loans increased from \$92 million a year ago to \$419 million as economic conditions weakened. The increase in specific loan allowances was primarily due to higher charges for SME loans in Hong Kong and Greater China as well as private banking loans in Singapore and Hong

Kong. Specific allowances for consumer and corporate loans also rose from a year ago, though by a smaller extent. Specific allowances for loans amounted to 35 basis points of average loans, compared to nine basis points in 2007.

Specific allowances for securities, properties and other assets were little changed from a year ago. Allowances were provided largely for debt securities issued by certain US and European financial institutions that defaulted. Specific allowances for investment CDOs amounting to \$48 million were made during the year compared to \$150 million in 2007.

The business segment results for 2007 and 2008 are prepared based on the DBS Group's organisation management reporting structure in these periods. As the activities of the DBS Group are highly integrated, internal allocation has been made in preparing the segment information. Amounts for each business segment are shown after the allocation of certain centralised costs, funding income and the application of transfer pricing, where appropriate. Transactions between segments are recorded within the segment as if they are third party transactions and are eliminated on consolidation.

The various business segments are described below:

Consumer Banking provides individual customers with a diverse range of banking and related financial services. The products and services available to customers include current and savings accounts, fixed deposits, loans and home finance, cards, payments and investment products.

Institutional Banking provides financial services and products to large corporate, institutional clients and small and medium sized businesses. The products and services available to customers include corporate finance and advisory banking services for mergers and acquisitions, capital raising through debt and equity markets, capital restructuring, syndicated finance, securities and fiduciary services, cash management and trade services, private equity and credit facilities, deposit and treasury products.

Global Financial Markets provides treasury services to corporations, institutional and private investors, financial institutions and other market participants. It is primarily involved in market making, structuring, equity and debt sales and trading across a broad range of financial products including foreign exchange, interest rate/credit/equity and other structured derivatives. Income from these financial products and services offered to the customer of other business segments, such as Consumer Banking and Institutional Banking, is reflected in the respective segments. Global Financial Markets also provides equity services through DBS Vickers Securities.

Central Treasury Unit is responsible for the management of the DBS Group's asset and liability interest rate positions and investment of the DBS Group's excess liquidity and shareholders' funds.

Central Operations encompasses a range of activities from corporate decisions and income and expenses not attributed to other business segments. Asset management and private banking activities are included in this segment.

Consumer Banking

Consumer loans and deposits continued to grow in 2008. Mortgage loans grew 12% partly as a result of momentum from strong housing markets in Singapore and Hong Kong in recent years. Singapore-dollar savings deposits grew 33% as the DBS Group benefited from a system shift toward savings deposits.

Net interest income was lower despite the increased volumes as deposit margins in Singapore narrowed with lower interbank rates. Non-interest income also fell due to lower wealth management product sales in Singapore and Hong Kong. Credit card fees rose 8% on a larger card base.

Expenses grew 5% mainly due to higher operating costs, which included a \$70 million charge for compensation to certain structured investment customers. Expenses were also higher in Indonesia where 18 Treasures priority banking centres and retail branches were opened during the year.

Total allowances increased slightly from \$23 million to \$42 million largely due to lower write-backs.

Institutional Banking

Institutional Banking was formed in October 2008 by merging Enterprise Banking and Corporate and Investment Banking.

Institutional Banking's net interest income rose 12% from higher loan volumes and margins. Deposit volumes were also higher, but were offset by lower deposit margins. Non-interest income rose 3% due to higher loan syndication fees. Sales of treasury products, such as foreign currency hedging instruments, remained strong.

Expenses fell 5% largely due to lower allocations for support costs. Total allowances rose 37% as specific allowances increased, particularly for SME loans in Hong Kong and Greater China.

Global Financial Markets

Global Financial Markets total income rose 1% as a 26% increase in net interest income more than offset a loss in non-interest income due to losses on credit-linked trading instruments. Stockbroking income was also lower. Non-interest income also included an \$86 million charge related to the Rosa conduit as well as costs from the unwinding of positions related to certain Lehman-exposed investment products sold to customers.

Expenses decreased 6% with lower wage costs.

Others

Central Treasury Unit's total allowances included the general and specific allowances set aside for investment CDOs.

The performance by geography is classified based on the location in which income and assets are recorded.

Singapore

Net interest income rose 6% as loan and deposit volumes grew in double-digits. Loan growth was led by corporate and SME borrowing across broad industry segments while deposit growth was led by savings accounts. Spreads on corporate and SME loans widened during the year, but this benefit was more than offset by sharply lower market rates. Margins on surplus funds also narrowed as interbank rates declined more than funding costs as a consequence of the DBS Group's savings deposits base.

Non-interest income declined 34% because of weak financial markets, which adversely impacted related fee and trading activities. Non-interest income for the year also included losses related to the liquidation of the DBS Group's Rosa conduit and the unwinding of positions related to certain Lehman-exposed investment products sold to customers.

Expenses decreased 9% due to lower staff costs. Total allowances increased as lower charges for CDOs were more than offset by higher total allowances for loans and other investment securities. Specific allowances increased as a result of charges for private banking loans and securities issued by certain US and European financial institutions, as well as lower recoveries in general.

Hong Kong

The results for Hong Kong incorporate the effects of an appreciation of the Singapore dollar against the Hong Kong dollar by 6% in the profit and loss account. The currency impact on the balance sheet was negligible.

Net interest income declined 18% due to lower interest margins and exchange translation effects. Net interest margin narrowed as prime rates fell faster than cost of funds, and this offset the benefit of higher loan volumes.

Non-interest income decreased 3% as higher contributions from treasury-related activities and gains from sales of financial investments were more than offset by slower markets-related fee activities and exchange translation effects.

Expenses rose 4% due to higher operating expenses. Allowances rose as credit quality, particularly for the SME and private bank portfolios, weakened.

Other regions

Earnings contribution from outside of Singapore and Hong Kong increased from 7% in 2007 to 15%. The largest earnings contributors are Indonesia through a 99%-owned subsidiary; China through a 100%-owned subsidiary; and India where the DBS Group has eight branches and a 37.5% stake in Cholamandalam DBS, a non-bank finance company.

In May 2008, to supplement its Greater China footprint, the DBS Group acquired certain assets of Bowa Commercial Bank including 39 branches across Taiwan.

Please read carefully the terms of this Offer Information Statement, the Steps and the terms and conditions for Electronic Applications set out below before making an Electronic Application. Any reference to “you” or the “applicant” in this section “Additional Terms and Conditions for Electronic Applications” and the Steps shall refer to you making an application for Preference Shares through an ATM of one of the relevant Participating Banks or the IB website of DBS Bank.

The Steps set out the actions that you must take at ATMs of DBS Bank (including POSB) or the IB website of DBS Bank to complete an Electronic Application.
